

World of Oceans Series

Take the plunge into the marine environment with this live-narrated educational video presentation.

Earl Richmond, an educational video producer and lecturer since 1989, presents *The World of Oceans Series*. Each year a new *World of Oceans Series* is created and live-narrated in schools, museums, aquariums, educational institutions and community centers throughout the country.

Richmond works closely with researchers to document the latest research and exploration of the marine environment. His work and marine assignments can be seen on **National Geographic**, **Animal Planet**, the **Discovery Channel** and the **BBC**.

The World of Oceans Series is captivating, educational and inspiring. The viewer takes an enchanted journey during this 45 to 60 minute speaker-supported, large screen video program.

This years documentary

“Where the Earth Breathes & Giants are Born”

features the worlds largest creature on the planet, the **Blue Whale**. The Gulf of California is the only known place where **Blue Whales** rear their young. One of a kind video footage captures the biodiversity of the region and presents the immediate need for conservation of this unparalleled habitat.

Other marine programs include:

Diving with Apex Predators - *Great White Sharks*

Vanishing Mermaids - *Florida's Western Manatee*

Unlocking the Secrets of the Blue Whale

Island Oasis & Pinniped Diving Behaviors - *Galapagos Islands*

A Whale for the Saving - *Rescue of a 45-foot, 40-ton humpback*

Wild Rescues - *The rescue work of the Santa Barbara Marine*

Mammal Center from California to Mexico to the Galapagos Islands

Grey Whales - *From breeding grounds to migration*

The Santa Barbara Channel - A look at its diverse marine life
